Magic in the Hollow World is drawn from a variety of sources. Clerics and Holy Warriors draw their power from the gods and from Divine founts of might; Primal classes commune with the spirits of the world around them and channel their might into transformative magic and great, devastating elemental expressions. Wizards and Sorcerers derive power from other sources - careful study of the rules of magic for the former, and the burning heritage of mighty dragons, fey, fiends, or celestials for the latter.

As a result, each of these spellcasting paradigms has slightly different mechanics.

Channeling

Channel	1 Action
Stam: 0	Concentration
You meditate briefly, drawing magical energy from your Divine or Primal source. Add 1 energy to your spellcasting pool. This remains in your pool until the end of the round, and can be spent to cast spells.	

Divine and Primal characters have a pool of magical energy that they can draw from, but this drawing requires time and focus. Such a character can use the Channel action to fill their pool, which can then be used to cast spells from their known spells. This pool has a maximum capacity equal to their spellcasting attribute (for example, Social for Clerics.)

Wizards and other Magi

The magical abilities of a Wizard or Swordmage are rooted in their studies. Most are able to cast through rituals, by following careful instructions and procedures to produce particular results. Practicing Magi will take a different approach in their day-to-day work, instead caching a selection of nearly-complete spells in their equipment, ready to be catalyzed and cast as needed.

Each day, a mage can prepare a number of known spells equal to the number of attuned items they have, with a total energy cost equal to their level. Certain abilities like Implement Mastery will affect this, allowing a mage to store additional spells in their gear. Casting or sustaining a spell from one of these takes the actions and additional resources in the spell's description. Once a spell has been cast from a particular item, that item must be primed again before it can be used to cast that spell. The exception is spells that cost 0 energy. Items holding these aren't discharged, and can be used again.

Sorcerers

Sorcerers draw their spellcasting energy directly from their blood. Instead of channeling energy or storing it in equipment, A Sorcerer can directly convert their Stamina into energy for their spells. As part of any actions used to cast a spell, a Sorcerer can spend stamina to pay energy costs.

Spells:

Here are a few sample spells

Shield	1 Reaction
Energy: 0	Concentrate, 1 Hand Somatic

Trigger: You are hit by an attack targeting AC or Reflex.

You materialize a barrier of force between you and your opponent. You Block the attack, using a die size of 1d6 and a Block value of +4.

Fire Bolt	2 Actions
Energy: 0	Concentrate, 1 Hand Somatic, Implement, Fire, Verbal

A bolt of flame leaps from your outstretched finger.

Make a ranged spell attack vs. Reflex against a target within 50 ft. On a hit, the target takes 2d8+your Spellcasting ability fire damage. This increases to 4d8+ your Spellcasting ability at Tier 2 and 6d8+ your spellcasting ability at Tier 3.

Heal	Variable Action
Energy: Varies	Concentrate, 2-hand Somatic, Verbal, Life

You channel raw life energy into your target, jump starting and accelerating their healing abilities.

For each action you spend, choose a target you can see within 30 ft. For each energy you spend, the target can spend 1 stamina to regain hit points. If a target is within your reach, you can touch them to add 1d6 per energy spent to this healing.

Fireball	2 Actions
Energy: Varies, minimum 2	Concentrate, 2-Hand Somatic, Fire, Implement, Material (Bat guano), Verbal,

At your command, a ball of fire flies forth and explodes.

Choose a 20ft. radius sphere within 100ft. Make an area spell attack vs. Reflex against every target in the sphere with line of effect to the center of the sphere, dealing 3d6 per energy spent + your Spellcasting ability fire damage on a hit, with half damage on a miss and no damage on a critical miss.
